

Corporate Overview

Who We Are

Government Acquisitions, Inc. is a proven provider of optimized IT infrastructure solutions and a trusted advisor to the federal government. We enable government organizations to become business agile by moving them from a technology-driven architecture to an agency-driven architecture.

From the datacenter to the desktop, Government Acquisitions is intensely focused on helping federal agencies and departments simplify operations, manage exploding data growth, increase efficiencies and cut costs through:

Consolidation & Virtualization – We enable federal agencies to reduce costs and optimize IT infrastructure by centralizing key technology resources and consolidating to a common architecture of fewer, more powerful and better-utilized systems.

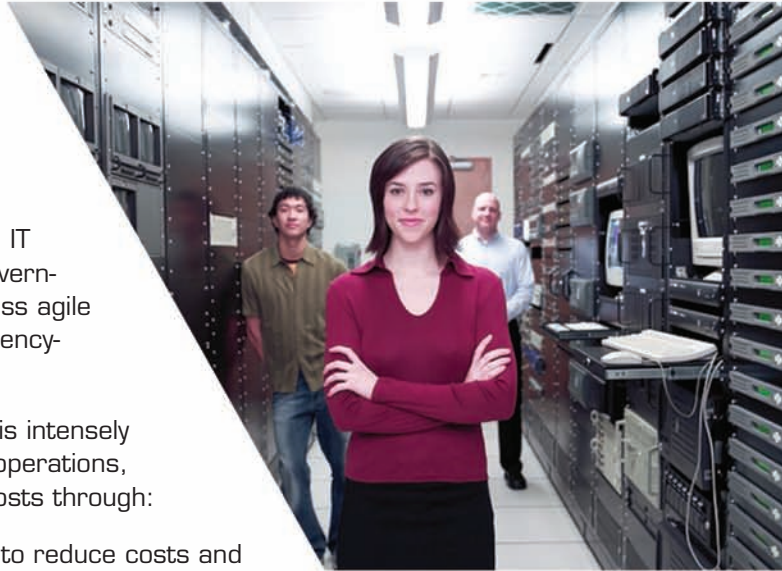

Information Assurance – We help federal agencies reduce internal and external risks of data loss/theft by improving identity management as well as data encryption, availability and integrity. Our identity management solutions help effectively and cost-efficiently increase security of operations and information while improving compliance and quality of service.

Information Automation – We provide improved access to and processing of mission-critical data, enabling government organizations to:

- Compile databases to arrive at a “single version of the truth”
- Access timely and trusted data to help make the right business decisions
- Manage operations and documents efficiently with better visibility and information transparency

Client Services – By helping federal agencies shorten deployment timelines, improve project management, increase flexibility and reduce labor costs, we’ve forged a strong reputation as a proficient manager of:

- Complex programs and large-scale system deployments
- Customized support services
- Staging, warehousing and staggered delivery.

Our Approach to IT Optimization

For Government Acquisitions, IT optimization is a process, not an isolated event. Pursuing an integrated approach and applying our knowledge of the federal domain, we leverage your current IT infrastructure, incorporate emerging technologies, and integrate the entire IT environment – people, process and technology – to customize relevant IT solutions throughout a project’s lifecycle:

- Strategy
- Analysis
- Design
- Deployment
- Integration
- Support

A Track Record of Stability and Performance

Government Acquisitions is a \$215 million company that has enjoyed organic, double-digit growth each year since our founding in 1989. By consistently providing “Best Value” performance to our customers, we have grown to become a top 35 hardware reseller on the GSA Schedule 70 contract, as well as ranked in the Government VAR 100, VAR Business 500, and Washington Technology Top 100 Federal IT Contractors.

Our Clients

Government Acquisitions provides total IT solutions exclusively to the federal government. Our credentials and deep relationships within the federal market enable us to continue to grow organically and be highly selective with the clients we serve.

Our diverse base of client work continues to expand within four federal Departments, including the Department of Commerce, Department of Treasury, Department of Homeland Security and U.S. Department of Agriculture.

Our Partners

Government Acquisitions takes a team-based approach to working with our government customers, and we are able to effectively manage multiple vendors while serving as a reliable single point of accountability. Government Acquisitions collaborates with only best-in-class service partners and manufacturers, including EMC, Hewlett-Packard, Symantec, Dell Computers, Sun Microsystems and VMWare.
